## Safety Data Sheet

According to Annex II to REACH - Regulation (EU) 2020/878 and to Annex II to UK REACH

### SECTION 1. Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Product name **BRAKE FLUID DOT 5.1**

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use **BRAKE FLUID DOT 5.1 (for B2B)**

| Identified Uses   | Industrial | Professional | Consumer |
|-------------------|------------|--------------|----------|
| Functional Fluids | ✓          | ✓            |          |

#### 1.3. Details of the supplier of the safety data sheet

Name **BREMBO N.V.**  
Full address **Registered office: Amsterdam (Netherlands)**  
District and Country **Business and Corporate Address: Via Stezzano, 87  
24126, Bergamo (BG) Italia**

Tel. +39 035 6051111

e-mail address of the competent person  
responsible for the Safety Data Sheet

**SDS@brembo.com**

#### 1.4. Emergency telephone number

For urgent inquiries refer to **+39 035 6051111 (8.30 – 17.30 IT, EN)**

### SECTION 2. Hazards identification

#### 2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2020/878. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:

Reproductive toxicity, category 2

H361fd

Suspected of damaging fertility. Suspected of damaging the unborn child.

#### 2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

**BREMBO N.V.**

Revision nr. 3

Dated 13/12/2023

Printed on 13/12/2023

Page n. 2/17

Replaced revision:2 (Printed on: 17/01/2023)

**BRAKE FLUID DOT 5.1**

Hazard pictograms:

Signal words: Warning

Hazard statements:

**H361fd** Suspected of damaging fertility. Suspected of damaging the unborn child.

Precautionary statements:

**P280** Wear protective gloves/ protective clothing / eye protection / face protection.  
**P201** Obtain special instructions before use.  
**P308+P313** IF exposed or concerned: Get medical advice / attention.**Contains:** tris[2-[2-(2-methoxyethoxy)ethoxy]ethyl] borate**2.3. Other hazards**On the basis of available data, the product does not contain any PBT or vPvB in percentage  $\geq$  than 0,1%.The product does not contain substances with endocrine disrupting properties in concentration  $\geq$  0.1%.**SECTION 3. Composition/information on ingredients****3.2. Mixtures**

Contains:

The full wording of hazard (H) phrases is given in section 16 of the sheet.

## SECTION 4. First aid measures

### 4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 30-60 minutes, opening the eyelids fully. Get medical advice/attention.  
SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention.  
INGESTION: Have the subject drink as much water as possible. Get medical advice/attention. Do not induce vomiting unless explicitly authorised by a doctor.  
INHALATION: Get medical advice/attention immediately. Remove victim to fresh air, away from the accident scene. If the subject stops breathing, administer artificial respiration. Take suitable precautions for rescue workers.

### 4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

### 4.3. Indication of any immediate medical attention and special treatment needed

Information not available

## SECTION 5. Firefighting measures

### 5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT  
The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.  
UNSUITABLE EXTINGUISHING EQUIPMENT  
None in particular.

### 5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE  
Do not breathe combustion products.

### 5.3. Advice for firefighters

GENERAL INFORMATION  
Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.  
SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS  
Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained

|                                                                                 |                            |                                                                                                           |

|                                                                                 | <b>BRAKE FLUID DOT 5.1</b> | Dated 13/12/2023<br>Printed on 13/12/2023<br>Page n. 4/17<br>Replaced revision:2 (Printed on: 17/01/2023) |

open circuit positive pressure compressed air breathing apparatus (BS EN 137).

## SECTION 6. Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

### 6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

### 6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

### 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

## SECTION 7. Handling and storage

### 7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

### 7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details.

### 7.3. Specific end use(s)

Information not available

## SECTION 8. Exposure controls/personal protection

### 8.1. Control parameters

| <p>Legend:</p> <p>(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.</p> <p>VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified ; LOW = low hazard ; MED = medium hazard ; HIGH = high hazard.</p> <p><b>8.2. Exposure controls</b></p> <p>As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.</p> <p>When choosing personal protective equipment, ask your chemical substance supplier for advice.</p> <p>Personal protective equipment must be CE marked, showing that it complies with applicable standards.</p> <p>Provide an emergency shower with face and eye wash station.</p> <p><b>HAND PROTECTION</b></p> <p>Protect hands with category III work gloves.</p> <p>The following should be considered when choosing work glove material (see standard EN 374): compatibility, degradation, failure time and permeability. The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.</p> <p><b>SKIN PROTECTION</b></p> <p>Wear category I professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.</p> <p><b>EYE PROTECTION</b></p> <p>Wear airtight protective goggles (see standard EN 166).</p> <p><b>RESPIRATORY PROTECTION</b></p> <p>If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type A filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.</p> <p>Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.</p> <p>If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.</p> <p><b>ENVIRONMENTAL EXPOSURE CONTROLS</b></p> <p>The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.</p> |                     |             |                                                                                                           |           |

|----------------------------------------|----------------|
| Initial boiling point                  | > 260 °C       |
| Flammability                           | not available  |
| Lower explosive limit                  | not applicable |
| Upper explosive limit                  | not applicable |
| Flash point                            | > 100 °C       |
| Auto-ignition temperature              | not available  |
| Decomposition temperature              | not available  |
| pH                                     | 9              |
| Kinematic viscosity                    | not available  |
| Dynamic viscosity                      | 900            |
| Solubility                             | soluble        |
| Partition coefficient: n-octanol/water | not available  |
| Vapour pressure                        | not available  |
| Density and/or relative density        | 1,000 - 1,100  |
| Relative vapour density                | not available  |
| Particle characteristics               | not applicable |

**9.2. Other information**

## 9.2.1. Information with regard to physical hazard classes

Information not available

## 9.2.2. Other safety characteristics

VOC (Directive 2010/75/EU) 0

VOC (volatile carbon) 0

**SECTION 10. Stability and reactivity****10.1. Reactivity**

The product may react exothermically on contact with strong oxidising or reducing agents, strong acids or bases.

Reaction mass of 2-(2-(2-butoxyethoxy)ethoxy)ethanol and 3,6,9,12-tetraoxahexadecan-1-ol

Hygroscopic.

**10.2. Chemical stability**

Excessively high temperatures can cause thermal decomposition.

Reaction mass of 2-(2-(2-butoxyethoxy)ethoxy)ethanol and 3,6,9,12-tetraoxahexadecan-1-ol

Avoid exposure to: air.

Hygroscopic.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                            |                                                                                                                                             |

Revision nr. 3

Dated 13/12/2023

Printed on 13/12/2023

Page n. 12/17

Replaced revision:2 (Printed on: 17/01/2023)

**BRAKE FLUID DOT 5.1**

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

**SECTION 12. Ecological information**

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

**12.1. Toxicity**

2,6-di-tert-butyl-p-cresol

EC50 - for Crustacea &gt; 0,61 mg/l/48h

Chronic NOEC for Crustacea 0,316 mg/l

2-(2-(2-methoxyethoxy)ethoxy)ethanol

LC50 - for Fish 10000 mg/l/96h

EC50 - for Crustacea &gt; 500 mg/l/48h

Chronic NOEC for Crustacea 3152 mg/l

Chronic NOEC for Algae / Aquatic Plants 1000 mg/l

DI-ISOPROPANOLAMINE

LC50 - for Fish &gt; 222,2 mg/l/96h

Reaction mass of 2-(2-(2-butoxyethoxy)ethoxy)ethanol and 3,6,9,12-tetraoxahexadecan-1-ol  
LC50 - for Fish

&gt; 1800 mg/l/96h

EC50 - for Crustacea &gt; 3200 mg/l/48h

EC50 - for Algae / Aquatic Plants 391 mg/l/72h

EC10 for Algae / Aquatic Plants 188 mg/l/72h

tris[2-[2-(2-methoxyethoxy)ethoxy]ethyl]  
borate

LC50 - for Fish &gt; 222,2 mg/l/96h

EC50 - for Crustacea &gt; 211,2 mg/l/48h

EC50 - for Algae / Aquatic Plants &gt; 224,4 mg/l/72h

**12.2. Persistence and degradability**

2,6-di-tert-butyl-p-cresol

NOT rapidly degradable

2-(2-(2-methoxyethoxy)ethoxy)ethanol

Rapidly degradable

DI-ISOPROPANOLAMINE

Rapidly degradable

tris[2-[2-(2-methoxyethoxy)ethoxy]ethyl]  
borate

Rapidly degradable

**12.3. Bioaccumulative potential**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                            |                                                                                                                                              |                                                                                            |  |  |

#### Substances in Candidate List (Art. 59 REACH)

On the basis of available data, the product does not contain any SVHC in percentage  $\geq$  than 0,1%.

#### Substances subject to authorisation (Annex XIV REACH)

None

#### Substances subject to exportation reporting pursuant to Regulation (EU) 649/2012:

None

#### Substances subject to the Rotterdam Convention:

None

#### Substances subject to the Stockholm Convention:

None

#### Healthcare controls

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

### **15.2. Chemical safety assessment**

A chemical safety assessment has been performed for the following contained substances

tris[2-[2-(2-methoxyethoxy)ethoxy]ethyl] borate

DI-ISOPROPANOLAMINE

Reaction mass of 2-(2-(2-butoxyethoxy)ethoxy)ethanol and 3,6,9,12-tetraoxahexadecan-1-ol

2,6-di-tert-butyl-p-cresol

#### LEGEND:

- ADR: European Agreement concerning the carriage of Dangerous goods by Road
- ATE: Acute Toxicity Estimate
- CAS: Chemical Abstract Service Number
- CE50: Effective concentration (required to induce a 50% effect)
- CE: Identifier in ESIS (European archive of existing substances)
- CLP: Regulation (EC) 1272/2008
- DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labeling of chemicals
- IATA DGR: International Air Transport Association Dangerous Goods Regulation
- IC50: Immobilization Concentration 50%
- IMDG: International Maritime Code for dangerous goods
- IMO: International Maritime Organization
- INDEX: Identifier in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%
- OEL: Occupational Exposure Level
- PBT: Persistent bioaccumulative and toxic as REACH Regulation
- PEC: Predicted environmental Concentration
- PEL: Predicted exposure level
- PNEC: Predicted no effect concentration
- REACH: Regulation (EC) 1907/2006
- RID: Regulation concerning the international transport of dangerous goods by train
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.
- TWA: Time-weighted average exposure limit
- TWA STEL: Short-term exposure limit
- VOC: Volatile organic Compounds
- vPvB: Very Persistent and very Bioaccumulative as for REACH Regulation
- WGK: Water hazard classes (German).

#### GENERAL BIBLIOGRAPHY

1. Regulation (EC) 1907/2006 (REACH) of the European Parliament
  2. Regulation (EC) 1272/2008 (CLP) of the European Parliament
  3. Regulation (EU) 2020/878 (II Annex of REACH Regulation)
  4. Regulation (EC) 790/2009 (I Atp. CLP) of the European Parliament
  5. Regulation (EU) 286/2011 (II Atp. CLP) of the European Parliament
  6. Regulation (EU) 618/2012 (III Atp. CLP) of the European Parliament
  7. Regulation (EU) 487/2013 (IV Atp. CLP) of the European Parliament
  8. Regulation (EU) 944/2013 (V Atp. CLP) of the European Parliament
  9. Regulation (EU) 605/2014 (VI Atp. CLP) of the European Parliament
  10. Regulation (EU) 2015/1221 (VII Atp. CLP) of the European Parliament
  11. Regulation (EU) 2016/918 (VIII Atp. CLP) of the European Parliament
  12. Regulation (EU) 2016/1179 (IX Atp. CLP)
  13. Regulation (EU) 2017/776 (X Atp. CLP)
  14. Regulation (EU) 2018/669 (XI Atp. CLP)
  15. Regulation (EU) 2019/521 (XII Atp. CLP)

**Note for users:**

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

**CALCULATION METHODS FOR CLASSIFICATION**

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.

Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.

msds for B2C.
